### **DETAILED ACTION**

This Office Action is in response to the pre-amendment with changes to the drawings, filed 5/7/04.

Currently, claims 1-6 are pending.

#### ***Drawings***

1. The drawings were received on 5/7/04. These drawings are approved by the Examiner as correcting Figures 4C-4D.

#### ***Specification***

2. The specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

#### ***Double Patenting***

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Art Unit: 2812

4. Claims 1-6 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-46 of U.S. Patent No. 6,544,880. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claimed subject matter is coextensive in the patent and the instant application, such as the substrate with upper and lower surface; the deposition of a layer of copper on the upper and lower surface of the substrate; patterning the layer of copper on the upper and lower surface of the substrate to form at least one bond pad thereon; depositing at least one layer of metal on at least a portion of the layer of copper; and connecting one end of a conductor lead of a TAB tape to the at least one layer of metal. Gold metal is claimed as well.

#### *Conclusion*

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See the PTO 892.
